Introduction

The Australian Election Survey

The Australian Election Study (AES) stands as Australia's premier research program examining political attitudes and electoral behaviour. Since 1987, the study has continuously surveyed voters across federal elections through to 2025, establishing an unmatched longitudinal evidence base on Australian political opinion. Through this research, the AES offers valuable insights into the factors driving voter decision-making at elections, alongside public sentiment on diverse policy matters. Beyond tracking long-term patterns of continuity and change within the Australian electorate, the study analyses the specific issues and political figures central to each election, assessing their influence on electoral outcomes. Data and reports for previous iterations of the AES are currently available at <https://australianelectionstudy.org/>.

The AES Aboriginal and Torres Strait Islander Extension

The 2025 AES ATSI Extension Study was designed to address a significant gap in understanding the political perspectives, attitudes, and electoral behaviours of Australia's First Nations peoples. As the first study of its kind, this research sought to amplify Aboriginal and Torres Strait Islander voices within the Australian political landscape by adopting the established framework of the Australian Election Study, ensuring methodological rigour and comparability with broader electoral research.

The study aimed to develop a comprehensive understanding of Aboriginal and Torres Strait Islander perspectives across several key dimensions of political engagement. Central to this was an examination of electoral participation and campaign engagement, encompassing patterns of enrolment, voting behaviour, satisfaction with the voting process, and the extent to which First Nations voters engaged with election campaigns. The

Australian
National
University

GAME CHANGERS

research also sought to assess political knowledge and issue salience within Aboriginal and Torres Strait Islander communities, including awareness of candidates' social and economic positions, levels of interest in the election, and identification of the issues considered most significant from First Nations perspectives.

A further objective was to examine Aboriginal and Torres Strait Islander perceptions of political parties and their leaders, alongside broader evaluations of democratic processes in Australia. This included assessing satisfaction with democracy and levels of trust in political institutions among First Nations peoples. By enabling comparative analysis with non-Indigenous populations through the established Australian Election Study framework, the research aimed to highlight distinctive patterns of political engagement within Aboriginal and Torres Strait Islander communities. Ultimately, the study sought to generate critical insights that could inform government and non-government agencies in understanding the strengths and barriers surrounding electoral participation and representation for Indigenous communities, thereby supporting the development of effective policies to enhance democratic engagement.

About This Report

The purpose of this technical methodological report is to explain in detail the approach taken when undertaking the 2025 AES ATSI Extension Study, including questionnaire design, sample design, data collection procedures, and data processing methods.

This report covers:

- Background and objectives of the AES ATSI Extension Study
- Sampling framework using the iMOB online panel
- Questionnaire development and alignment with the broader Australian Election Study
- Details of fieldwork conducted from November 25 to December 16, 2025
- Data collection and quality control procedures
- Weighting methodology and sample composition

Australian

University

GAME CHANGERS

- Response metrics

The AES ATSI Extension Study was conducted following ethical approval from the Australian Institute of Aboriginal and Torres Strait Islander Studies (AIATSIS) Ethics Committee and the Australian National University Research Ethics Committee (Ethical Clearances: REC-0531 and H/2025/0634, respectively). The research was conducted in compliance with Ipsos' legal obligations under the Privacy Act, ISO 9001, ISO 20252, and ISO 27001, and membership requirements for The Australian Data and Insights Association (ADIA) and The Research Society. Recruitment and sample management were conducted by the Ipsos Aboriginal and Torres Strait Islander Research Unit (ATSIRU) through their iMOB online panel.

Methodology

Approach

The 2025 AES ATSI Extension Study employed a quantitative online survey methodology to gather data on the political attitudes and electoral behaviours of Aboriginal and Torres Strait Islander peoples. This approach was selected to enable broad geographic reach across metropolitan, regional, rural, and remote areas of Australia while facilitating efficient data collection. The online survey format also ensured methodological alignment with the broader Australian Election Study framework, allowing for comparability of findings between First Nations and non-Indigenous populations.

The study targeted a national sample of 800 Aboriginal and Torres Strait Islander adults aged 18 years and older. Recruitment and sample management were conducted by the Ipsos Aboriginal and Torres Strait Islander Research Unit (ATSIRU) through their iMOB online panel. This recruitment approach was selected for its capacity to reach First Nations participants across diverse geographic locations while maintaining cultural appropriateness in the research process.

Potential participants were recruited via email invitation and

Australian
National
University

GAME CHANGERS

directed to an online version of the survey that included the participant information sheet. Survey completion rates were monitored throughout the data collection period to maximise participation, with SMS reminders sent to potential participants as needed. The survey was designed to take approximately 15 minutes to complete, and participants received \$30 deposited into their bank account upon completion to acknowledge their time and contribution.

Data collection commenced on 25 November 2025 following ethical approval, with the survey remaining open until the target sample was achieved on 16 December 2025. A minimum viable sample of 500 participants was established as the threshold for meaningful analysis, providing a margin of error of ± 4.4 percentage points at the 95% confidence level for national-level findings.

iMOB panel

The AES ATSI Extension Study utilised the iMOB online panel, managed by the Ipsos Aboriginal and Torres Strait Islander Research Unit (ATSIRU). The ATSIRU, a team led and staffed by Aboriginal and or Torres Strait Islander researchers, has dedicated significant time and effort to build the iMOB panel with the aim of raising Aboriginal and / or Torres Strait Islander voices in social and market research. Established in 2023, iMOB is a dedicated research platform for Aboriginal and Torres Strait Islander peoples aged 18 years and older who have opted in to participate in research surveys, with approximately 3,000 members at the time of fieldwork. All panel members are recruited in person by members of the ATSIRU to confirm Indigenous identification in a respectful and culturally appropriate way. The panel provides broad geographic coverage across metropolitan, regional, rural, and remote areas of Australia.

Recruitment to the AES ATSI Extension study was conducted via email invitation, with potential participants directed to the online survey including the participant information sheet. Survey completion rates were monitored throughout fieldwork, and e-mail and SMS reminders were sent to non-responding panel members to

Australian
National
University

GAME CHANGERS

encourage participation. All participants who completed the survey received \$30 deposited into their nominated bank account upon completion.

Questionnaire

The AES ATSI Extension Study and 2025 AES Questionnaire were provided to Ipsos by the Australian National University. Ipsos and the Australian National University worked collaboratively to update the AES ATSI Extension Study questionnaire to ensure comparison with the established Australian Election Study framework.

The questionnaire was designed as a quantitative online survey instrument, taking approximately 15 minutes to complete and covered several key thematic areas relevant to understanding First Nations political engagement and attitudes. These included electoral participation and campaign engagement, encompassing patterns of enrolment, voting behaviour, and satisfaction with the voting process. The instrument also examined political knowledge and awareness of candidates' positions on social and economic issues, as well as levels of interest in the election and identification of key election issues from Aboriginal and Torres Strait Islander perspectives. Additionally, the questionnaire explored perceptions of political parties and their leaders, alongside broader attitudes towards democracy and trust in political institutions within First Nations communities.

The final approved questionnaire covered the following topics:

- Section A: The Election Campaign
- Section B: Party Preference and Voting
- Section C: Politicians and Government
- Section D: Election Issues
- Section E: Social Policy
- Section G: Social Background, Education and Work

The final version of the questionnaire is available in Appendix 1.

Sample

The AES ATSI Extension Study targeted a national sample of 800 Aboriginal and Torres Strait Islander adults aged 18 years and older. Sample recruitment and management were conducted by the Ipsos Aboriginal and Torres Strait Islander Research Unit (ATSIRU) through their iMOB online panel. The panel-based approach enabled broad geographic coverage across metropolitan, regional, rural, and remote areas of Australia.

The research team aimed to achieve a sample as representative of the Aboriginal and Torres Strait Islander population as possible. Given the logistical challenges inherent in compiling a large sample of Aboriginal and / or Torres Strait Islander participants, specific demographic quotas beyond the overall sample size target were not predetermined.

Fieldwork Timelines

Fieldwork for the AES ATSI Extension Study was conducted over a

Australian
National
University

GAME CHANGERS

three-week period from 25 November to 16 December 2025. This fieldwork period followed the 2025 federal election, allowing respondents to reflect on their recent electoral experiences and attitudes towards the election outcomes.

Data collection

Fieldwork Period and Survey Administration

Data collection for the AES ATSI Extension Study was conducted over a 22-day period from 25 November to 16 December 2025. The study employed an online survey methodology, administered through the Dimensions platform. The survey was designed to be device agnostic, enabling respondents to participate via mobile phone, desktop computer, tablet, or other internet-enabled devices according to their preference and accessibility.

Sample Source, Recruitment and Consent

The sample was sourced from the Ipsos ATSI iMOB online panel. Recruitment was conducted via email invitation, with potential participants directed to the online survey which included the participant information sheet. All iMOB panel members had previously opted in to participate in research surveys, and consent for this study was obtained through an implied consent process whereby participants confirmed they had read and understood the Participant Information Sheet before proceeding with the survey; participants were advised they could pause, skip questions, or withdraw at any time prior to submission, and could request removal of their responses after submission by contacting Ipsos using their unique de-identified iMOB ID.

Incentives

To acknowledge participants' time and contribution, all respondents who completed the survey received \$30 deposited directly into their nominated bank account upon completion.

Field Management

A member of the Ipsos project management team monitored survey completions throughout the fieldwork period to track progress towards the target sample size. During data collection, adjustments were made to the recruitment strategy to ensure

Australian
National
University

GAME CHANGERS

demographic diversity within the sample. Specifically, initial invitations and some reminder communications were prioritised towards male panel members, as this group typically exhibits lower response rates in survey research. This targeted approach was implemented to achieve a more balanced distribution across gender categories in the final sample.

Reminders

To maximise participation, five reminder communications were sent to non-responding panel members during the fieldwork period, comprising four email reminders and one SMS reminder distributed between 3 and 16 December 2025. Additional details are available below in Table 2 and in Appendix 3.

Table 2 – Reminders Sent

Reminder	Date
Email Reminder 1	3 December 2025
SMS Reminder 2	9 December 2025
Email Reminder 3	10 December 2025
Email Reminder 4	12 December 2025
Email Reminder 5	16 December 2025

Response Information

A total of 2,630 invitations were distributed to iMOB panel members during the fieldwork period. From these invitations, 802 surveys were completed, yielding a completion rate of 30.5%. The average survey completion time was 6.7 minutes.

Quality control and data cleaning

The survey data was exported in SPSS format and underwent a systematic quality control process. An experienced member of the Ipsos research team checked the dataset for skimmer cases, errors, and discrepancies using SPSS and Q analytical software packages, with a second team member conducting an additional quality assurance review.

Data cleaning and back coding were required for open text

responses at Q53, which asked respondents how old they were when they left secondary school. Logic checks identified instances where respondents had entered illogical values or year of school completion rather than age. Responses were recoded based on calculated age using year of birth and year left school where applicable. Ages from 0 to 4 were back coded to "No formal schooling," and ages from 5 to 11 were back coded to "Went to primary school only." In two cases where respondents had entered improbable ages or years, it was determined that typographical errors had likely occurred, and the data was corrected accordingly (for example, an entry of 206 was amended to 26, and an entry of 1906 was amended to 1996).

The final cleaned dataset was delivered to the Australian National University in SPSS format, accompanied by a data dictionary prepared by the Ipsos research team.

Summary Statistics

Weighted and unweighted tables were reviewed by the Ipsos team and have been included as an appendix. Please see Appendix 4 for details.

Weighting

A post-stratification weight was applied to align the collected sample to population benchmarks drawn from the Australian Bureau of Statistics 2021 Census (the most recent available at time of writing). The sample was weighted by age, gender, and location using an iterative proportional fitting algorithm (Rake weight) applied using the Q statistical software package.

Age

Participants were allocated into four groups for weighting: 18-24 years, 25-39 years, 40-54 years, and 55+ years.

Gender

The survey used best-practice principles for social research, allowing respondents to indicate a gender identity other than

Australian
National
University

GAME CHANGERS

male or female. Unfortunately, the Australian Bureau of Statistics does not currently release population benchmarks for non-binary identification. So, for the purposes of weighting, the seven participants (1%) who selected 'other' were randomly allocated to either the male or female.

Location

The postcode provided by participants was used to allocate each person to a State/Territory. The jurisdictions of South Australia, Western Australia, and the Northern Territory were combined for the weighting.

Trimming

The maximum weight was set to 4 and the minimum to 0.25 meaning the largest weight was 16 times larger than the smallest. Fewer than one percent (n=3) of cases received the smallest weight, while 3% (n=6) of cases received the largest weight.

Effective Sample Size

The effective sample size after weighting was 535 (66%).

Table 3 - Sample distribution (weighted and unweighted)

	Population (n)	Population (%)	Sample (n)	Unweighted Sample (%)	Weighted Sample (%)
Male, 18+	238,527	48.5%	209	26%	47%

Objectives:

The Australian Election Study: Perspectives of Aboriginal and Torres Strait Islander Peoples aims to understand the perspectives of Aboriginal and Torres Strait Islander peoples in relation to:

- Electoral participation and campaign engagement: including enrolment, voting behaviour, satisfaction with voting;
- Knowledge of social and economic views of the candidates and the issues, interest in the election, main election issues
- Perceptions of Parties and leaders: Democracy and the political process: satisfaction with democracy, trust in political institutions,

This study has been designed to highlight the voices of Aboriginal and Torres Strait Islander peoples regarding their levels of political engagement compared to non-Indigenous populations.

We would like to thank you for taking the time to complete the survey, your opinions and responses are extremely important to us.

Ipsos is conducting this survey on behalf of The **Australian National University**.

The survey asks about your experiences and opinions, in relation to **voting, politics, and democracy**. The answers you give help **researchers and government** to understand how **Aboriginal and Torres Strait Islander peoples** view voting and politics, and make sure **Indigenous voices** are heard.

Please be assured that your answers will be stored securely in Australia, kept private, and only shared in a de-identified way. No one will know your name or personal details.

Appendix 2 – Participant Information Sheet

Australian Election Study: Aboriginal and Torres Strait Islander Extension

1. Who we are

Ipsos Aboriginal and Torres Strait Islander Research Unit (ATSIRU) is part of a global company named Ipsos. Ipsos is the 3rd largest research company in the world. Ipsos started the ATSIRU in 2016 to build a better working relationship with Aboriginal and Torres Strait Islander research participants and communities to ensure we work with communities in a culturally respectful manner.

If you have concerns or complaints at any stage of the questionnaire or the project as a whole, you may raise these with the following culturally appropriate services:

Data collection contact:

Ipsos ATSIRU
Michael Barnes
Mobile 0424 741 448

Other contacts:

The Executive Director of Research or the Chair of the AIATSIS Research Ethics Committee, AIATSIS, 51 Lawson Crescent, Acton ACT 2601, Email ethics@aiatsis.gov.au

Chair of the AIATSIS Research Ethics Committee, by calling 02 6261 4251 or writing to the AIATSIS Research Ethics Committee, AIATSIS, 51 Lawson Crescent, Acton ACT 2601. This is an independent Committee whose members do not work for AIATSIS

Indigenous controlled help lines and local support are available if you require it at:

13YARN at 13 92 76 for 24/7 crisis support from Aboriginal and Torres Strait Islander crisis supporters

Aboriginal Community Controlled Health Organisations (ACCHOs) are available near you via the NACCHO map (<https://www.naccho.org.au/locations/>) or via the WellMob website (<https://wellmob.org.au/>) which also contains online tools and resources for mental health.

2. What we are doing

We are conducting a survey called the Australian Election Study: Aboriginal and Torres Strait Islander Extension. The Australian Electoral Study has been conducted at every federal election since 1987. The survey is funded by the Australian Research Council and The Australian National University. This survey will be conducted using a representative sample of the Australian public.

For the first time, we are conducting an additional version of the Australian Election Study with around 800 Aboriginal and/or Torres Strait Islanders.

The study will provide an understanding of people's attitudes towards elections and democracy in Australia.

The interview will take around 15 minutes to conduct and all interviews will be completed online.

We are inviting you, as a member of our iMOB panel, to participate in this survey.

3. What sort of questions will be asked?

Everyone will be asked questions about their involvement in elections, attitudes towards politicians and political parties, satisfaction with democracy, and views on social and economic policies. You can choose what questions you want to answer. If you find the questions are causing you distress, you can stop the interview and not answer any more questions simply by closing the online survey, it is your choice what information you would like to share with us.

YOU CAN STOP AT ANY TIME, PARTICIPATION IS VOLUNTARY.

4. Permission to do this research

If you initially decide you want to talk to us and then change your mind – that's OK, no-one has to talk to us. If you don't like what we ask, you don't have to answer. If you decide you don't want to take part, close the survey.

By commencing the survey, you are implying consent. This means that you agree that you have read this information, or have had it read to you by someone that you trust and agree to take part.

THIS RESEARCH IS VOLUNTARY

IT IS UP TO EVERY PARTICIPANT IF THEY WANT TO SAY YES.

EVEN AFTER PARTICIPANTS HAVE SAID YES THEY CAN STOP AT ANY TIME.

5. Keeping interviews private

Personal details will appear on the Consent and bank deposit forms only. These forms will need to be retained by Ipsos ATSIRU for audit purposes only and will not be shared with anyone else, this includes our partners on this project, the Australian National University. The forms will not be attached to your story.

Reports may be made publicly available and/or published in journals. We will ensure individual's personal stories are not able to be identified.

No culturally restricted information will be collected.

ATSIRU

GAME CHANGERS

Your answers will be stored securely in Australia, kept private, and only shared in a de-identified way. No one will know your name or personal details

6. What we have done so far:

We submitted an Ethics Application to the Australian Institute of Aboriginal and Torres Strait Islander Studies (AIATSIS) Ethics Committee and the Australian National University Research Ethics Committee to seek Ethical approval for this project. The Ethical Clearances have been approved (REC-0531 and H/2025/0634, respectively)

We cannot guarantee or promise that participants will receive any direct, individual benefits from this project.

Each person that completes an interview will receive a \$30 EFTPOS bank deposit to the account details you shared when you registered with iMOB. To change these account details please email Michael.barnes@ipsos.com

7. Results of Study

Ipsos ATSIRU will share the data received from you with the Australian National University. They will combine the data from the surveys and interviews run by Ipsos ATSIRU with other surveys completed by the broader Australian population to produce findings for the total population.

Reports and resources will be produced using this combined population-level data, with some analysis to show differences between Indigenous and non-Indigenous Australians. Names of survey participants will NOT be presented in these reports, nor will the Australian National University know you have participated. Reports and resources will be written so that they talk about everybody in the community that shared their stories overall and will not talk about participants individually.

This research aims to better understand Aboriginal and/or Torres Strait Islanders' political engagement and representation in order to identify barriers and develop policies that will contribute to social change, improve Indigenous well-being and strengthen Australian democracy.

Results from the study will be made available at <https://australianelectionstudy.org/> and communicated in the media. A copy of all reports will be provided to AIATSIS, and published reports will be uploaded into the YUMI SABE Indigenous Research Exchange (<https://yumi-sabe.aiatsis.gov.au>)

8. DATA STORAGE:

Data will be stored by Ipsos in accordance with its data privacy and retention policies. It will also be deposited by the ANU into the Australian Data Archive. Data collection and privacy policies for both are available here:

Ipsos: <https://www.ipsos.com/en/privacy-data-protection>

Australian Data Archive: <https://ada.edu.au/about-ada>

9. WHY THE SURVEY IS IMPORTANT

The survey will give researchers a better understanding of Indigenous political participation and political involvement. The results will ensure that Indigenous needs are better understood by the main political actors and agencies at both the state and national level. The project will identify the main impediments to achieving more effective representation for Indigenous communities and their policy priorities.

10. THE IPSOS ATSIRU PROJECT TEAM:

If you would like to contact the research team please email:

Sharon.barnes@ipsos.com

Michael.barnes@ipsos.com

Other Ipsos researchers: Daniel Pole, Ellie Kirby

ANU researchers: Professor Peter Yu, Professor Matthew Grey, Professor Nicholas Biddle, Professor Ian McAllister

If you have concerns or complaints at any stage of the questionnaire or the project as a whole, you may raise these with the following culturally appropriate services:

Data collection contact:

Ipsos ATSIRU
Michael Barnes
Mobile 0424 741 448

Other contacts:

The Executive Director of Research or the Chair of the AIATSIS Research Ethics Committee, AIATSIS, 51 Lawson Crescent, Acton ACT 2601, Email ethics@aiatsis.gov.au

Chair of the AIATSIS Research Ethics Committee, by calling 02 6261 4251 or writing to the AIATSIS Research Ethics Committee, AIATSIS, 51 Lawson Crescent, Acton ACT 2601. This is an independent Committee whose members do not work for AIATSIS

Australian Election Study: Aboriginal and Torres Strait Islander Extension

By clicking the link to commence this survey through iMOB, you are agreeing that you:

- Would like to share your thoughts on the Australian Election Study with Ipsos
- Understand that Ipsos ATSIRU conducting this project for the Australian National University to understand:
 - Your voting and enrollment behavior, satisfaction with voting and interest in the 2025 election
 - Your knowledge and views of political candidates, issues and policies
 - Your perceptions of and trust in political parties and leaders
 - Your satisfaction with and trust in Australian democracy
- Understand that it is your choice to participate; you know that you do not have to do this and that you CAN SAY NO, STOP OR WITHDRAW YOUR PARTICIPATION AT ANY TIME.
- You understand that your stories will remain private (confidential). The answers you provide will be combined with 800 other people's before reporting, and your name or identifying information will not be published.

University

Appendix 3 - Participant Contact Invitation

Dear <First name>,

You are receiving this email as you are a member of Ipsos iMOB.

We are conducting a project called the Australian Election Study: Aboriginal and Torres Strait Islander Extension. This is a significant national study being carried out on behalf of the Australian National University. Everyone will be asked questions about their attitudes towards politics and elections in Australia. You can choose what questions you want to answer.

If you find the questions are causing you distress, you can stop the interview and not answer any more questions, it is your choice what information you would like to share with us.

To opt in to participate, you need to:

- Be an Aboriginal and/or Torres Strait Islander person,
- Be aged over 18 years old,

You can only participate once. You will be paid \$30 for participation which will be deposited into your nominated bank account or paid to the charity you have pre-selected.

If you would like to participate in this survey, please click on the survey link below and follow the instructions within the survey. The survey should take around 15 minutes for you to complete.

If you have any issues or require any assistance, please reach out to Michael.barnes@ipsos.com> or call 0424 741 448.

This research is voluntary. You don't have to take part if you don't want to.

If you want to take part in the survey, please click here:

SMS Reminder

Hi <First name>. You have a new paid iMOB survey, please complete the survey via the following link: <Full Survey Link>
Any issues or to OPT OUT please contact iMOB@ipsosurveys.com.au

E-mail Reminder

Dear <First name>,

**Australian
National
University**

GAME CHANGERS

As a friendly reminder, we are looking for up to 800 people to complete a survey which will ask questions about **your attitudes towards politics and elections in Australia**. Ipsos is conducting this survey on behalf of the **Australian National University (ANU)**.

The survey **should take around 15 minutes to complete** depending on your answers, and **you will be paid \$30 for completing it**.

To qualify for the survey, you must be...

- An Aboriginal and/or Torres Strait Islander person
- At least 18 years old

You can only participate once. You will be paid \$30 for participation which will be deposited into your nominated bank account or paid to the charity you have pre-selected.

This research is voluntary. You don't have to take part if you don't want to.

If you find the questions are causing you distress, you can stop the interview and not answer any more questions, it is your choice what information you would like to share with us.

If you want to take part in the survey, please click here:

<Full Survey Link>

If the above button does not work, please copy and paste the link below into your browser:

<Full Survey Link>

Survey Closure Date: 17/12/2025 (this is subject to change should we reach the intended **800** responses earlier than the closure date)

Payments: *Payments will be processed as soon as possible after the survey closure date listed above. It may take up to 10 days after the survey closure date to show in your account.*
