

COMP3425 and COMP8410 Data Mining 2026

Assignment 2 Description of Data

Data and Metadata

The data supplied for the assignment arises from The Australian Data Archive's (ADA) [Australian Election Study 2025 Indigenous Voters Survey Dataverse](#) [1].

If you accept and use a copy of the data provided by me, you are assumed to accept the Terms and Conditions of Use reproduced below. Please read them carefully. Your use of the data provided by me serves as your agreement to those terms. The custodian of the data has requested you delete your data at the end of the course. However, you would be able to download another copy at the website.

The data is provided to you for the assignment in two forms. The first is the **original** dataset as downloaded from the ADA called **2_IndigenousVoters_2025_CSV_100297_GENERAL.csv** in comma-separated-values format. Please note that missing values in the data are often coded as a space character, that may appear to be blank but is not. This data is described by the metadata in the data dictionary **1_IndigenousVoters_2025_Data_Dictionary_100297_GENERAL.xlsx** and in the report **1_IndigenousVoters_Report_100297.pdf**. The accompanying metadata is essential for the assignment.

The second is a form **derived** from the original, **pre-processed** for the assignment in comma-separated-values format called **Indigenous_Voters_pp.csv**. Please note the “_pp” filename suffix to indicate that it has been further pre-processed from the ADA original. A summary of the pre-processing undertaken is given below.

If you are a COMP3425 (undergraduate) student, you must work with the pre-processed dataset Indigenous_Voters_pp.csv

If you are COMP8410 (postgraduate) student you may use either the original or the pre-processed data, or both. The original may give you more opportunity to show off your technical skills and creativity, while the pre-processed one is more constrained but may save time, requiring you to spend less effort understanding the data, and helping to avoid some data errors. The same rubric will be used for marking in both cases, but the original dataset may provide an extended learning experience and better opportunity for higher marks with additional work. Even if you use the original data, you may find it useful to observe the pre-processing that has been undertaken to seed ideas or to solve problems you encounter.

Pre-processing to derive “Indigenous_Voters_pp.csv”

- Attributes that are marked “RESTRICTED” in the data dictionary have been entirely removed. Otherwise all the original attributes have been retained.

- The attribute *Q15_pp* has been added. It is defined as (in Excel) =IF((A13=4),1,IF((A13=" "),"",0)). This is a binary variable that is positive (value 1) iff Q15 is "4", meaning Greens. It is negative (value 0) iff Q15 has some value other than 4. It is missing if Q15 is missing.

Custom Dataset Terms — the following Custom Dataset Terms have been defined for this dataset.

Conditions of Use

I acknowledge that:

1. Use of the material is restricted to use for analytical purposes and that this means that I can only use the material to produce information of an analytical nature.

Examples of such uses are:

- (a) the manipulation of data to produce means, correlations or other descriptive summary measures;
- (b) the estimation of population characteristics from sample data;
- (c) the use of data as input to mathematical models and for other types of analyses (e.g. factor analysis); and
- (d) to provide graphical and pictorial representation of characteristics of the population or sub-sets of the population.

2. The material is not to be used for any non-analytical purposes, or for commercial or financial gain, without the express written permission of the Australian Data Archive.

Examples of non-analytical purposes are:

- (a) transmitting or allowing access to the data in part or whole to any other person / Department / Organisation not a party to this undertaking; and
- (b) attempting to match unit record data in whole or in part with any other information for the purposes of attempting to identify individuals.

3. Outputs (such as statistics, tables and graphs) obtained from analysis of these data may be further disseminated provided that I:

- (a) acknowledge both the original depositors and the Australian Data Archive;
- (b) acknowledge another archive where the data file is made available through the Australian Data Archive by another archive; and
- (c) declare that those who carried out the original analysis and collection of the data bear no

responsibility for the further analysis or interpretation of it.

4. Use of the material is solely at my risk and I indemnify the Australian Data Archive and its host institution, The Australian National University.

5. The Australian Data Archive and its host institution, The Australian National University, shall not be held liable for any breach of this undertaking.

6. The Australian Data Archive and its host institution, The Australian National University, shall not be held responsible for the accuracy and completeness of the material supplied.

Confidentiality Declaration

You may be asked to complete a signed General Undertaking form if this is the first time you will be downloading data from the Australian Data Archive.

Special Permissions

None

Restrictions

The depositor may be informed (by the archive) of use being made of the data, in order to comment on that use and make contact with colleagues of similar interests.

Citation Requirements

All manuscripts based in whole or in part on these data should:

- (i) identify the data and original investigators by using the recommended bibliographic reference to the data file;
- (ii) acknowledge the Australian Data Archive and, where the data are made available through the Australian Data Archive by another archive, acknowledge that archive;
- (iii) declare that those who carried out the original analysis and collection of the data bear no responsibility for the further analysis or interpretation of them.

Depositor Requirements

In order to assemble essential information about archival resources and to facilitate the exchange of information about users' research activities, individuals are required to email ADA (ada@anu.edu.au) with the bibliographic details and, where available, online links to any published work (including journal articles, books or book chapters, conference presentations, theses or any other publications or outputs) based wholly or in part on the material.

Disclaimer

Use of the material is solely at the user's risk. The depositor, The Australian National University and the Australian Data Archive shall not be held responsible for the accuracy and completeness of the material supplied.
